

In addition to regular reading, spelling and times tables practice, you may like to complete some of these activities to support your learning

Create a Rainforest Diorama

Make a 3D rainforest scene using a shoebox, cardboard, paper, recycled materials or anything you have at home. Try to show the different layers of the rainforest and include some of the animals and plants that live there.

Design Your Own Rainforest Animal

Invent a new rainforest animal. Draw and label it, then decide: What does it eat? Where does it live? How does it move? What adaptations help it survive? Give your animal a name!

Build the Rainforest Layers

Create a model showing the emergent layer, canopy, understory and forest floor. Add animals and plants to the layer where they would be most likely to live. You could make it as a hanging model, poster or 3D model.

Rainforest Animal Fact File

Choose a rainforest animal and create a colourful fact file. Include information about its habitat, diet, appearance, behaviour and adaptations. Add drawings, diagrams and interesting facts.

Create a Rainforest Food Web

Choose several rainforest plants and animals and create a food web to show who eats whom. Use arrows to connect the plants and animals. You could make it as a colourful poster, a 3D model or a hanging display. Challenge yourself to include producers, herbivores, carnivores and decomposers.

Rainforest Art Challenge

Create a piece of rainforest artwork using paint, pencils, collage, printing or recycled materials. Try to show the amazing plants, animals and different layers of the rainforest.

Design a Rainforest Survival Kit

Imagine you are going to spend a week exploring the rainforest. Design a survival kit containing 6-10 useful items. Draw or make your kit and explain why each item would be useful in the hot, wet rainforest.

Rainforest Baking Challenge

Bake something with your family and give it a rainforest theme! You could make animal biscuits, a rainforest cake or something inspired by tropical fruits. Weigh or measure the ingredients yourself and take a photo to share with the class.

Colour in the boxes to show the activities you have completed
