

Home Learning Tasks - Oaks - Autumn 2020

Our Topic is 'Brilliant Britain'

Here is a selection of things you could do for your home-learning tasks. Select one or more, whatever takes your fancy. Have fun together learning about new things. Surprise your parents with what you know and me with what you have found out. I look forward to seeing what you do. These last for the whole term.

1. Find out where you were born. Was it in Britain? If it was, which country. Draw a map to show where you were born. If it wasn't in Britain, where was it?

2. Find out about the 4 home countries in the UK. England, Wales, Scotland and Northern Ireland. Draw, paint, make a model of some of the landmarks. For England you could do Big Ben.

3. Find out about some traditional recipes in the UK. Cook something delicious like Scones.

The Counties of Great Britain

4. Find out about a castle. What different sorts are there? What do they look like? What stories do you know about castles? Do a castle project, be as inventive as you like.

5. Make a sword that a Knight would have used to rescue a princess. Write a story about it. Maybe a princess used the sword to save the Knight!

6. Do a survey of British Castles with your family, which ones have they been to and which one is their favourite? Make a graph to show your results. You could do a pictogram with potato prints.
